The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 34-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gellert (US Patent 4026518) in view of Gellert (US Patent 5,614,233).

Gellert '518 discloses a valve pin having a shoulder 70 which avoids dead spots for the accumulation of molten plastic in the passage of the nozzle. The valve pin further has a lower portion for the cut off of plastic to the nozzle gate.

Gellert '233 discloses a conventional nozzle 12 without a valve pin to shut off plastic flow to the nozzle gate 20 to allow for unobstructed flow of plastic through the nozzle.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to omit the lower portion of the valve pin of Gellert '518 to allow for unobstructed flow of plastic through the nozzle as suggested by Gellert '233.

Claims 1-12 and 20-33 are allowed. The claims define over the prior art since the prior art fails to disclose or suggest a stagnation zone cleaner independent of the valve as set forth in the claims.
